

A new, online database of Prince Edward Island media & film professionals has just been created. This site is a directory of people & productions looking for Island film & broadcast media expertise. It's a way for Island writers, producers, directors, actors, videographers, editors and other professionals to profile their skills online.

The PEI Cultural Human Resource Sector Council contracted Blue Tree Media to create this online directory. You can find the site at <http://www.peifilmmedia.com>, and information on how to create and edit your own profile is found at <http://www.peifilmmedia.com/resources/member-guide>. Please help spread the word about this new media & film resource!
